

Thank you for trusting us with your storage needs. We have prepared this pack to welcome you to our storage family.

STACKING & UNIT ORGANIZATION TIPS

- Use strong, same-size boxes where possible**
Uniform boxes stack safely and save space.
- Fill boxes fully (but not too heavy)**
Half-filled boxes can collapse; overfilled boxes can burst. Aim for: light items in large boxes, heavy items in small boxes.
- Label every box on multiple sides**
Include a quick list of contents + which room it belongs to. This makes retrieval easier.
- Put heavy items on the bottom and fragile and light items on top**
Build a stable base layer with sturdy boxes or bins.
- Create an aisle**
Leave a walkway from front to back so you can reach items without unloading everything.
- Store frequently used items near the front**
Rarely used items can go toward the back.
- Use vertical space wisely**
Stack to the ceiling but make sure stacks are stable.
- Stand sofas and mattresses on end (if safe)**
Cover them, and avoid placing items on top to prevent warping.
- Keep an inventory list**
A simple checklist or photo log helps track where things are inside the unit.
